

Introducing BondGPTSM

BondGPT uses a large language model (LLM) together with a range of publicly available data, proprietary data and proprietary models, leveraging natural language capabilities to respond to bond-related questions in seconds.

BondGPT is LTX's AI-powered application that answers complex bond-related questions and assists users in identifying bonds, themes, and trends.

POWERED BY OPENAI GPT-4 TOGETHER WITH BOND AND LIQUIDITY DATA DRIVEN BY LTX'S PROPRIETARY MODELS

- Details on 20,000+ bonds
- Patent-pending bond similarity model helps identify bonds which meet specific needs
- Real-time liquidity information and dealer selection analytics incorporated in LTX platform version
- Timely, accurate responses generated from the seamless blending of various verified datasets

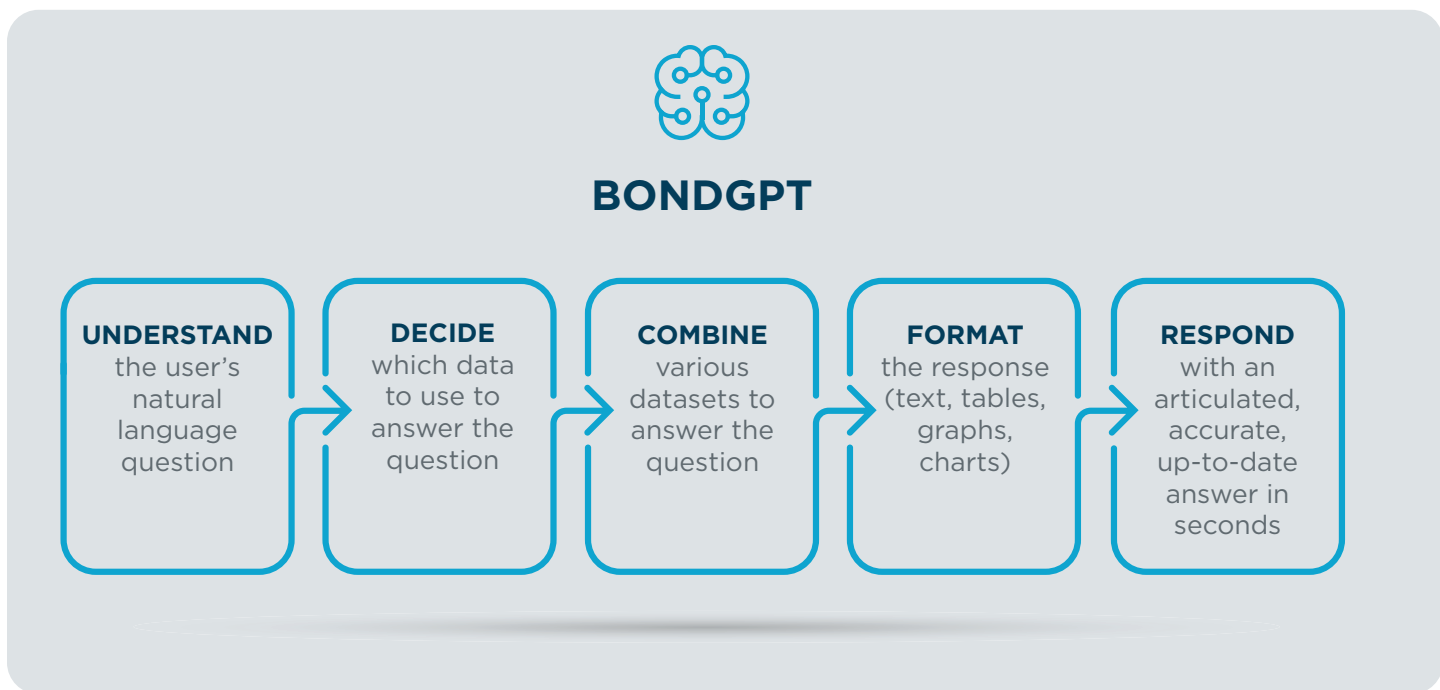

INTEGRATED DIRECTLY IN THE LTX TRADING PLATFORM, BONDGPT USES GENERATIVE AI TO SIMPLIFY WORKFLOWS AND DRIVE EFFICIENCY

- Informs and expedites vital pricing decisions
- Facilitates counterparty selection
- Broadens liquidity access
- Enhances the often-complex bond selection and portfolio construction processes

BONDGPT BENEFITS:

- **Save time:** Use natural language to ask complex questions and receive responses to most questions in less than 20 seconds.
- **Benefit from immediate insights:** Access many datasets at once and receive responses based on the seamless blending of these disparate datasets.
- **Reduce screen real estate:** Save space – BondGPT is a tiny chatbox that only takes up more space on your screen when you need it.
- **Incorporate internal data:** Securely integrate your company's internal sources of data, combining your mission-critical internal data with data you consume from third party providers.
- **Reduce reliance on expensive market data tools:** Simplify your corporate bond trading workflows with AI-powered efficiency.

How it works

INFORMATION SECURITY AND COMPLIANCE

As a Broadridge company, information security in BondGPT is a paramount concern for LTX. Broadridge is one of a select group of US companies that are ISO 27001 certified and CSA STAR Level 2 Certified (Cloud Security Alliance Security Trust Assurance and Risk).

Client queries into BondGPT leverage OpenAI GPT-4 using Broadridge's OpenAI enterprise services account. OpenAI is contractually required to maintain the confidentiality of all Broadridge/LTX input and output and not use any client content to develop or improve the OpenAI services. LTX operates from a registered broker dealer and adheres to a three-year communication retention requirement.

BondGPT utilizes an AI-powered compliance rules engine which actively monitors BondGPT responses and evaluates them based on a number of compliance rules, including avoiding responses that contain investment advice.
