New Opportunities to Trade Emerging Market Bonds with Transparency and Efficiency

LTX is an electronic trading platform that enables bond market participants to trade smarter, combining powerful, patented artificial intelligence with innovative e-trading protocols to improve liquidity, efficiency, and execution.

Now, you can trade dollar-denominated corporates and sovereigns on LTX.

The lack of transparency in Emerging Markets trading means that information and liquidity may be difficult to come by. To help facilitate emerging markets liquidity, an electronic buy- and sell-side ecosystem is now available on LTX. Pre-trade anonymity is protected with minimal information leakage.

UNDERSTAND YOUR ABILITY TO GET YOUR TRADE DONE

- **The Liquidity Cloud®** is a repository of non-distributed buy- and sell-side IOIs that signal natural, pre trade contra interest when an exact match is detected
- LTX continuously analyzes the contents of the Liquidity Cloud and notifies users of natural contra-interest with **Cloud Match Scores** which describe the strength of the match(es) based on price and size without disclosing actual axe/IOI
- Dynamic Cloud Match Scores update in real time, alerting users to new contra-interest and changes to contra price and size
- When liquidity is not available, patented **bond similarity technology** helps identify bonds with similar characteristics that have real-time contra-interest for your direction, size, and price
- Continuous Evaluated Pricing™ (CEP™) data from ICE Data Pricing & Reference Data is available within LTX at no additional charge and can be used to set a default price
